### 3D Embossed DIY

The most remarkable characteristics of wood plastic composite lies in high strength, anti-rust, anti-corrosion, acid resistance and free of maintenance. It is a great innovation in building and decoration industry.

This new material is eco-friendly, non-pollution, harmless and recyclable. It contains no benzene, the formaldehyde content is 0.2, which is lower than the EO standard, meeting the European's top environmental standards.

It can greatly save the use of wood, which echos the principle of sustainable development and brings great benefit to the so ciety.

K21-169 Project

Wpc aluminium fence is a little different from wpc fence. we use aluminium post and rail instead of wpc ones. It makes the fence much more strong.  
This brand new wpc fencing series is quite popular now and almost all parts are made of wpc material. If you don't want to use wpc post and top profile, we also have aluminium ones.

- Advantages of WPC Fencing
1. Tough weather resistance -absolutely
  2. Beautiful design on both sides and for the neighboring
  3. Dyed-no painting or finishing process
  4. Resistance to insects and fungi
  5. Easy care-clean with just water
  6. Environmental friendly
  7. 100% recyclable
  8. Easy to be installed

### TOP PROFILE FENCING BOARD

W\*H mm: 25\*160mm

### WPC POST

W\*T mm: 100\*100      W\*T mm: 100\*100      W\*T mm: 120\*120

Nowadays, this kind of fencing system becomes more and more popular all over the world. Fencing board is still wpc material but frames are aluminum which is much more stronger than wpc frames and even can be powder coated the same color with fencing boards. Enjoy this wonderful fencing in your own places.

# The Great Wall panel

The Great Wall board is a wood-plastic material modeling board, which belongs to ecological wood. It is a new type of green environmental protection material synthesized from wood flour and plastic plus other reinforcing additives. Because the cross section resembles the Great Wall, it is called the Great Wall Board. The Great Wall board, because of its unique charm, ranks among the hottest models in the decoration industry. The simplicity reveals the atmosphere, the linear overlap makes the space more open, and the delicate texture makes the material more advanced. This light luxury and minimalist style is exactly what many people are pursuing now! The modeling board presents details with texture, and subtle differences inadvertently change the atmosphere of the overall picture.
