Offer Sweet Dreams To The World

10PB-05

Firmness	/	1-Very soft — 4 — 5-Medium — 10-Very Firm
Height	/	**12 cm**
Main structures	/	• Bio-based memory foam • Latex • Wool • Nano pocket spring • Foam encasement

INTRODUCE

Luxury Knitted Fabric

The smooth surface, combined with the natural fluffy feel of wool, makes the fabric feel delicate and soft to the touch, and comfortable against the skin. It has excellent moisture absorption (higher than cotton). It can quickly absorb sweat, and wool can regulate humidity to avoid stuffiness.

Bio-based zero-pressure foam

Soft and delicate to the touch, it provides a cloud-like comfort experience. Free from harmful chemicals, it is safe for the body. It is a natural, eco-friendly material with smart temperature control, antibacterial, and anti-mite properties.

Nano Pocket Spring

Nano springs have an extremely small diameter and are densely distributed, providing precise point-to-point support for every part of the body.Each Nano spring operates independently, effectively reducing partner disturbance and achieving zero-interference sleep.

Latex

Latex has excellent elasticity, allowing it to quickly return to its original shape and provide long-lasting support.Latex is inhospitable to dust mites, helping to reduce allergens.Latex is a natural, eco-friendly material.

INTRODUCE

Luxury Knitted Fabric

The smooth surface, combined with the natural fluffy feel of wool, makes the fabric feel delicate and soft to the touch, and comfortable against the skin. It has excellent moisture absorption (higher than cotton). It can quickly absorb sweat, and wool can regulate humidity to avoid stuffiness.

Bio-Based Memory Foam

It can degrade in the soil without causing pollution to the soil. It gradually rebounds according to pressure and temperature, fits the body contour, and provides excellent support for the body, making sleep more comfortable and helping to relieve physical fatigue.

Nano Pocket Spring

Nano springs have an extremely small diameter and are densely distributed, providing precise point-to-point support for every part of the body.Each Nano spring operates independently, effectively reducing partner disturbance and achieving zero-interference sleep.

7-Zone Pocket Springs

Each pocket spring conforms to the shape of the body, providing support based on individual weight and contours.For example: head, neck, shoulders, waist,hips, legs and feet. This targeted support can help relieve pressure points and reduce back pain.

INTRODUCE

High Quality Knitted Fabric

The high quality knitted fabric with Eco Comfort Fiber , an environmentally friendly comofrt layer which allows natural airflow for a more refreshing night's sleep which is breathable, antibacterial and anti-odor, supportive and prevent pilling.

Bamboo Charcoal Breathable Fiber

With its natural eco-friendliness, moisture-wicking, antibacterial and anti-mite properties, far-infrared function, and negative ion release, bamboo charcoal fiber is the ideal choice for a healthy lifestyle.

Bio-Based Zero-Pressure Foam

Soft and delicate to the touch, it provides a cloud-like comfort experience. Free from harmful chemicals, it is safe for the body. It is a natural, eco-friendly material with smart temperature control, antibacterial, and anti-mite properties.

Main structures	/	• High quality knitted fabric • Memory foam • Convoluted foam • Pocket spring • High density support foam

INTRODUCE

High Quality Knitted Fabric

The high quality knitted fabric with Eco Comfort Fiber , an environmentally friendly comofrt layer which allows natural airflow for a more refreshing night's sleep which is breathable, antibacterial and anti-odor, supportive and prevent pilling.

High density comfort foam

High-density foam has excellent rebound properties, allowing it to quickly return to its original shape and provide long-lasting support.

Convoluted foam

The wave structure promotes air circulation, keeping the mattress dry and preventing heat buildup, suitable for year-round use.

Pocket Spring

Pocket spring system provides strong overall support, effectively cradling the spine and maintaining natural physiological curves for better spinal health.

INTRODUCE

Skin-friendly Knitted Fabric

Skin-friendly Knitted Fabric with Eco Comfort Fiber , an environmentally friendly comofrt layer which allows natural airflow for a more refreshing night's sleep which is breathable, antibacterial and anti-odor, supportive and prevent pilling.

Gel Memory Foam

Gel Memory Foam combines pressure-relieving memory foam with cooling gel infusion. It adapts to body curves, evenly distributing weight to reduce pressure points, while the gel particles enhance heat dissipation and maintain a refreshing sleep surface. This material delivers personalized comfort, breathability, and long-lasting support for deeper, cooler sleep.

CNC Cutting High Density Support Foam

CNC-cut high-density support foam precisely contours the body, providing stability, comfort, and long-lasting sleep support.

Wave mesh springs with foam encasement

Wave mesh springs with foam encasement provide flexible body support, enhanced edge stability, and long-lasting durability, creating a quiet and comfortable sleep experience.

INTRODUCE

Skin-friendly Knitted Fabric

Skin-friendly Knitted Fabric with Eco Comfort Fiber , an environmentally friendly comofrt layer which allows natural airflow for a more refreshing night's sleep which is breathable, antibacterial and anti-odor, supportive and prevent pilling.

Air-Ventilation Convoluted Foam

Air-Ventilation Convoluted Foam: The convoluted foam layer improves airflow, allowing for better ventilation and reducing heat buildup, helping you stay cool throughout the night.

Bio-based zero-pressure foam

Bio-based zero-pressure foam is made from renewable plant-based materials, combining eco-friendliness with advanced comfort. Its unique zero-pressure structure distributes body weight evenly, relieving pressure points on the shoulders, back, and hips. With excellent breathability and resilience, it ensures long-lasting support while creating a healthier and more sustainable sleep environment.

Wave mesh springs with foam encasement

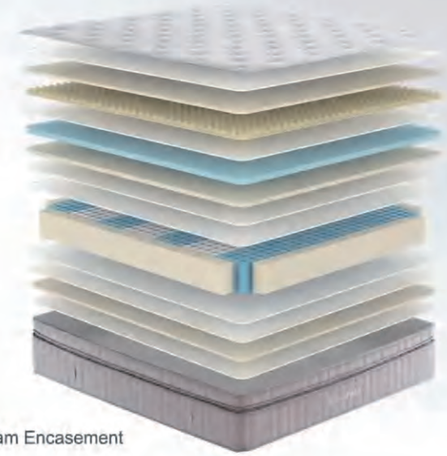

Wave mesh springs with foam encasement provide flexible body support, enhanced edge stability, and long-lasting durability, creating a quiet and comfortable sleep experience.

INTRODUCE

Cool Tech Knitted Fabric & Breathable Fiber

Luxuriously soft, moisture-wicking, and skin-friendly, keeping you cool and comfortable all night.

Air-Ventilation Convoluted Foam

The convoluted foam layer improves airflow, allowing for better ventilation and reducing heat buildup, helping you stay cool throughout the night.

Charcoal Memory Foam

Activated bamboo charcoal helps control temperature and moisture, absorbs odors and allergens, and keeps the air fresh.

7 Zone High-Compression Pocket Spring

Each pocket spring conforms to the shape of the body, providing support based on individual weight and contours.For example: head, neck, shoulders,waist,hips, legs and feet. This targeted support can help relieve pressure points and reduce back pain.

INTRODUCE

Luxury Ice silk Fabric

Experience the silky-smooth Luxury Ice Silk Fabric, keeping you cool, fresh, and comfortable all night. Its antibacterial, skin-friendly design ensures a healthy and elegant sleep.

Luxury knitted fabric

Ultra-soft Luxury Knitted Fabric, offering breathable comfort and gentle elasticity for a perfect night's sleep. Durable and skin-friendly, it adds elegance and lasting quality to your bedding.

Nano Pocket Spring

Nano Pocket Spring provides precise support and adapts to your body for ultimate comfort. Its motion-isolating and breathable design ensures a quiet, refreshing sleep all night long.

Memory foam

Memory foam contours to your body's shape, providing personalized support and relieving pressure points for enhanced comfort. It also effectively reduces tossing and turning during sleep, helping you achieve deeper rest.

INTRODUCE

Luxury knitted fabric

Luxury knitted fabric allows natural airflow for a refreshing night's sleep which is breathable, antibacterial and anti-odor, supportive and prevent pilling.

Bio-base memory foam

Bio-based memory foam is crafted from renewable plant-derived materials, offering superior pressure relief, excellent contouring support, and reduced environmental impact. It maintains the same durability, comfort, and resilience as traditional memory foam, while being more eco-friendly and sustainable.

high resilience foam base support

The firm bottom layer provides the necessary counter pressure, whatever your sleeping position, and offers comprehensive support for your lower back.

Removable fabric cover

Easy cleaning, ensuring a fresh and hygienic experience at all times. Made from high-quality materials, it offers durability and comfort while effortlessly refreshing your home decor.

INTRODUCE

Luxury Knitted Fabric

Luxury knitted fabric allows natural airflow for a refreshing night's sleep which is breathable, antibacterial and anti-odor, supportive and prevent pilling.

High Density Support Foam

Memory foam contours to your body's shape, providing personalized support and relieving pressure points for enhanced comfort. It also effectively reduces tossing and turning during sleep, helping you achieve deeper rest.

High Resilience Foam Base Support

Foam support layer provides even support, enhancing the mattress's stability and durability while distributing body pressure evenly. Its high resilience helps maintain shape, preventing sagging and ensuring long-lasting comfort for a better sleep experience.

INTRODUCE

Luxury Knitted Fabric

Ice silk fabric is a smooth, cool and silky synthetic fabric. The primary function is to enhance the comfort and cooling properties of the sleeping surface.

High Density Support Foam

Memory foam contours to your body's shape, providing personalized support and relieving pressure points for enhanced comfort. It also effectively reduces tossing and turning during sleep, helping you achieve deeper rest.

High Resilience Foam Base Support

Foam support layer provides even support, enhancing the mattress's stability and durability while distributing body pressure evenly. Its high resilience helps maintain shape, preventing sagging and ensuring long-lasting comfort for a better sleep experience.

Orthopedic Sleep Memory Foam Pillow

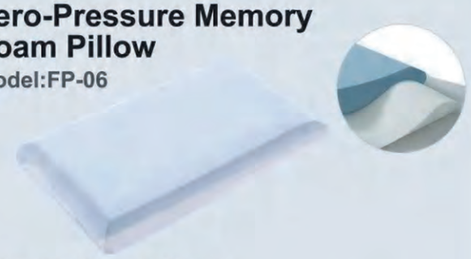

Model:FP-12

Material	**Memory Foam**		
Sizel	63x38x13.5/10cm	Packing	1 pcs/box

Zero-Pressure Memory Foam Pillow

Model:FP-06

Material	**Memory Foam**		
Sizel	70x42x10cm	Packing	1 pcs/box

TPE Cooling Contour Memory Foam Pillow

Model:FP-07

Material	**Memory Foam**		
Sizel	74x48+14cm	Packing	1 pcs/box

Zero-Pressure Deep Sleep Memory Foam Pillow

Model:FP-03

Material	**Memory Foam**		
Sizel	60x35x8/10cm	Packing	1 pcs/box

Cool Zero-pressure Memory Foam Pillow

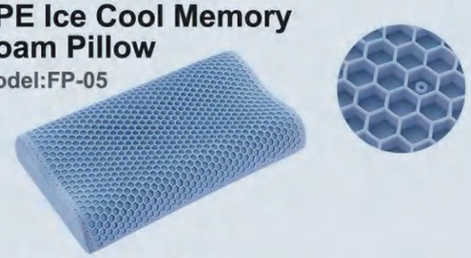

Model:FP-03PLUS

Material	**Memory Foam**		
Sizel	60x40x10/12cm	Packing	1 pcs/box

TPE Ice Cool Memory Foam Pillow

Model:FP-05

Material	**Memory Foam**		
Sizel	60x35x8/10cm	Packing	1 pcs/box

TPE Breathable Microfiber Pillow

Model:FP-04

Material	**Polyester fibere**		
Sizel	64x36+7cm	Packing	1 pcs/box

Shredded Memory Foam Pillow

Model:FP-11A

Material	**Memory foam and polyester fiber**		
Sizel	70x45cm	Packing	1 pcs/box
