Resin Bent Cane Chair (K/D style)

Resin Bent Cane Chairs are typically made from cane, resin and rattan, shaped into curved forms.

The term "bent" refers to the technique of bending the cane to create the chair's frame, legs, or backrest, which results in elegant, flowing curves.

Solid Wood Bending Technique This chair is crafted using solid wood bending technology. The process involves carefully selecting high-quality wood, which is then steamed or heated to make the fibers flexible. Once softened, the wood is bent into precise curves using and specialized equipment. After cooling and drying, the wood retains its elegant, curved form without losing strength or stability.

HR-WOOD1104SB

H90cm W41cm D49cm

This technique not only ensures structural durability but also provides a refined, symmetrical shape that enhances both comfort and aesthetics. Chairs made with bent solid wood are lightweight, resilient, and exhibit a natural beauty that highlights the craftsmanship behind each piece.
